

Firmware Update - Release Notes

Product Name: Klick & Show K-10S Kit (7488000300)

Firmware

Version: V2.2.8C.K1058

Filesize: 382 MB

Release Date: 12.12.2018

New Features:

- Add **Security Level 1-3** function to satisfy different security requirements (see chap. 5.5)
- Add **Extended Desktop** functionality for Windows 10 operation system (see chap. 6.1)
- Add **Time display** in Home screen, when connected via LAN to NTP time server (see chap. 2.3)

Changes / Improvements:

- Update the Home screen (GUI) graphics for button-TOUCH and dongleless software client (dual-use)
- Changed default "WirelessMedia" window, as small window, when using the dongle
- Change automatically to small window in dongleless mode, when the connection was made
- Update the warning messages when the version of "WirelessMedia" driver or button TOUCH do not match with Base-unit
- Do "Eject" immediately when user SEE or CLICK "OK, USB driver is safely removed!" when copying Start-program „WirelessMedia.exe“ to USB-stick
- When "Auto change WiFi password" is set to "never", the password will be saved, even when power is lost
- Change term "SSID" to "ID" in Home screen for future applications

Solved Bugfixes:

- "WirelessMedia" driver for MacOS is not compatible with older Macs (CPU)
- When switching at "WirelessMedia" window to external HDMI-IN, the picture was cut on each side

Version: V2.2.6C.K1045

Filesize: 374 MB

Release Date: 02.10.2018

Remarks:

Updating of firmware is recommended for all devices!

"Factory Reset" is NOT needed after update!

*Needs update of Firmware of **Sensor-button TOUCH (V2.1.7C)***

*and **STARTER program** for Windows-Laptop: **V2.2.8.5**, or for Mac: **V1.3.1.5***

*New features and changes are described in updated **User Manual 2.2.8C / E***

Remarks:

Updating of firmware is recommended for all devices!

"Factory Reset" is NOT needed after update!

New Features:

- New Starter-program "**WirelessMedia**" for Windows, which is **universal** for Windows for use **with** or **without** Sensor-button TOUCH (using LAN or Wi-Fi of laptop), mixed operation in a meeting is possible, (chapt. 6 in Manual)
- New graphic design (GUI) of Starter-program "WirelessMedia" for Windows/Mac (chap 6 in Manual)
- Support Over-the-Air (OTA) firmware upgrading via Ethernet (chap 5.7 in Manual)

*Needs update of Firmware of **Sensor-button TOUCH (V2.1.4C)***

*and **STARTER program** on Windows-Laptop: **V2.1.8.5**, and Mac: **V1.2.3.5***

*New features and changes are described in updated **User Manual V2.2.6C***

Changes / Improvements:

- Add optional **Starter-Program "WirelessMedia-pro.exe"** for download from Web-browser of K & S base-unit; "**WirelessMedia-pro.exe**" is **not installed** in Windows Autostart: the K & S App does not auto-start upon connecting the button TOUCH, user has to manually launch it; due to valid security-restrictions of some IT-administrations (chap 6.1 in Manual)
- Add menu option to turn the WiFi hotspot ON or OFF, when unit is powered on
- Add menu option to hide PC's username when mirroring
- Add menu option for setting the menu-login without password
- Delete the zip files in the "WirelessMedia.exe" program, which removed the "digital signature" in files
- Access the registry only one time, when connecting the Sensor-button TOUCH
- Renew digital signature for Mac driver "WirelessMedia.app"

Solved Bugfixes:

- Solved the Audio problem at Windows 10: 'No Sound in Mainscreen, when mirroring'
- Corrected menu writings
- Small, known bugfixes corrected

Version:

V2.2.3C.K1027

Filesize:

285 MB

Release Date:

07.05.2018

New Features:

- Support "Preview windows" of all attached buttons (see chapter 5.3 in Manual)
- Support "Low Latency Mouse" for smooth mouse cursor (see chapter 7 in Manual) and ideal video playback.

Recommended for all Units

Please see important remarks for units with Serial number 0181804xxx, FW V2.1.1.C K1014: It may be necessary, to update to version V2.1.3CK1022 first, before update to V2.2.3C.K1027 !

Version:

V2.1.3C.K1022

Filesize:

Release Date: 394.3 MB
03.04.2018

New Features:

Solved Bugfixes:

- Solved the Airplay problem up to **iOS 11.2.6**

IMPORTANT Remarks for SPECIAL FIRMWARE UPDATE:

*This Update is a **MUST** for units with **Serial number 0181804xxx**, **AND** installed Firmware **2.1.1.C K1014 at Base unit at delivery**. Unfortunately, a number of units of this batch have received a wrong customer-ID code during production process, which needs a special, single procedure for correction. Affected units do not work with Apple Airplay with iOS 11.2.6 or lower or Android WirelessMedia APP.*

You urgently need internet access to automatically connect to our server for the generation of the correct customer-ID, which is written to the Base unit, during update process!

Please contact Kindermann-Service to get the special instructions and Download-link for update!

No "Factory Reset" (via the menu „System Update“ / „Factory reset“) is needed!

Version:

V2.1.1C.K1014

Filesize:

Release Date: 283.3 MB
29.01.2018

Recommended for all Units

Please see "Important notice" to version V2.0.9C.K1008
